

**FINCANTIERI**

FINCANTIERI AND GRIMALDI SIGNED CONTRACT FOR THE RENEWAL OF TWO CRUISE FERRIES

Trieste/Naples, March 30, 2018 – After the signing of the letter of intent on March 5, Fincantieri and the Grimaldi Group signed the contract for the lengthening and refurbishment program for the cruise ferries “**Cruise Roma**” and “**Cruise Barcelona**”. The construction of the two mid-body sections will begin in 2018, while the completion of the works at Palermo shipyard is foreseen within summer 2019.

The two vessels, currently in service on the daily route Civitavecchia- Porto Torres-Barcelona with the “Grimaldi Lines” livery, have been built by Fincantieri shipyard in Castellammare di Stabia and delivered to the Neapolitan group in 2007 and 2008 respectively. They are 225 meters long, having a gross tonnage of 54,000 tons and capacity of transporting about 3,000 passengers, a 2,400 square meters car deck and approx. 3,000 linear meters for heavy vehicles.

About 600 additional linear meters for heavy vehicles, 80 sleeping accommodations in new passenger cabins, two new public spaces with a total capacity of 450 Pullman beds and a new “Family self-service” restaurant having about 270 seats, will be placed in the lengthening section, about 29 meters long. Furthermore important refurbishment works on the existing public areas will also be carried out, including the creation of a theme restaurant. Finally, safety equipment of the ship will be implemented in order to manage the increased passenger transport capacity.

At the end of the lengthening project, to be carried out by Fincantieri’s Ship Repair and Conversion, part of the Services division, **each ship will be about 254 meters long, having a gross tonnage of about 63,000 tons and being able to transport 3,500 passengers, with a 3,000 square meters car deck and over 3,700 linear meters for heavy vehicles.**

From the technological point of view cutting-edge solutions aimed at reducing the environmental impact and energy saving will be taken, such as the scrubber system for the exhaust gas cleaning as well as a system to power the ship during the turnaround time in ports, based on mega-lithium

batteries, in order to avoid the use of the diesel-powered generators, achieving the goal of **zero port emissions**, pursued by the Grimaldi Group.

In the past Fincantieri has built 30 different types of vessels for Grimaldi.
