

FINCANTIERI SUSTAINABILITY PLAN 2018-2022 PUBLISHED***The company commitment to strengthen sustainability culture continues***

Trieste, December 13, 2018 – Following approval by the Board of Directors, Fincantieri has published its **Sustainability Plan** in a dedicated section of its homepage (www.fincantieri.com/it/sostenibilita). This is a milestone in the process undertaken by the company, aimed at disseminating and strengthening the sustainability culture, an increasingly pivotal element to create value in the long term.

The Plan fulfills some of the major global challenges, such as the United Nations "Sustainable Development Goals" and embodies Fincantieri strategic vision. Thanks to the integration of the Sustainability and the Business Plan, Fincantieri will be able to handle the answer to today's and tomorrow's markets challenges by combining business growth and financial solidity in accordance with the principles of social and environmental sustainability.

The document reflects the **commitments undertaken by the Group in the four main areas** of the Business Plan (long-term visibility, new horizons and markets, innovation, lean production), with qualitative and quantitative targets on sustainability for the period 2018- 2022.

Fincantieri main commitments in the sustainability field relate to the promotion of a responsible supply chain, involvement of employees, constant improvement of health and safety at work, support of technological innovation, maintaining customer satisfaction and loyalty, continuous dialogue and support of local communities, reducing environmental impacts and contributing to the fight against climate change.

The report on the achievement of the targets will be regularly provided with the publication of the future Sustainability Reports.

Fincantieri is one of the world's largest shipbuilding groups and number one for diversification and innovation. It is leader in cruise ship design and construction and a reference player in all high-tech shipbuilding industry sectors, from naval to offshore vessels, from high-complexity special vessels and ferries to mega yachts, as well as in ship repairs and conversions, production of systems and mechanical and electrical component equipment and after-sales services.

With over 230 years of history and more than 7,000 vessels built, Fincantieri has always kept its management offices, as well as all the engineering and production skills, in Italy. With over 8,400 employees and a supplier network that employs nearly 50,000 people, Fincantieri has enhanced a fragmented production capacity over several shipyards into a strength, acquiring the widest portfolio of clients and products in the cruise segment. To hold its own in relation to competition and assert itself at global level, Fincantieri has broadened its product portfolio becoming world leader in the sectors in which it operates.

With globalization, the Group has around 20 shipyards in 4 continents, over 19,000 employees and is the leading Western shipbuilder. It has among its clients the world's major cruise operators, the Italian and the US Navy, in addition to several foreign navies, and it is partner of some of the main European defense companies within supranational programs.

Fincantieri's business is widely diversified by end markets, geographical exposure and by client base, with revenue mainly generated from cruise ship, naval and offshore vessel construction. Compared with less diversified players, such diversification allows it to mitigate the effects of any fluctuations in demand on the end markets served.
