

“VIKING NEPTUNE” FLOATED OUT IN ANCONA

Trieste, January 13, 2022 – “Viking Neptune”, the newest ocean cruise ship which Fincantieri is building for the shipowner Viking, has been floated out today at the shipyard in Ancona.

The unit will be placed in the small cruise ship segment. As its sister ships, she is about 47,800 tons, 465 cabins with accommodation for 930 passengers.

“Viking Neptune”, eighth of this class, has been designed by experienced naval architects and engineers, including an interior design team of London-based SMC Design, and Los Angeles-based Rottet Studios, who gave the ship a modern design of Scandinavian inspiration, characterized by sophisticated yet functional elegance. In addition to the all-veranda staterooms, the ship also has spacious suites with sweeping views, two pools, of which one infinity pool off the stern, abundant options for al fresco dining, and a spa designed according to the wellness philosophy of the Scandinavian tradition, with a sauna and a snow grotto.

The Viking units are all built according to the latest navigation regulations and equipped with the most modern safety systems, including the “safe return to port”. They also feature energy-efficient engines, optimized hydrodynamics and hull thereby reducing consumption, as well as systems which minimize pollution produced by exhaust gases, meeting the strictest environmental regulations.

Fincantieri started its partnership with Viking in 2012, trusting the shipowner who was entering the ocean cruise market as a start-up. Today, the cooperation which first began with an order for two ships, has reached a total of 20 units, including the order awarded to Vard for two expedition cruise ships, “Viking Octantis” and “Viking Polaris,” and the options. This is an all-time record, the largest number of units ordered to a shipbuilder by one sole shipowner.

Other 9 units, options included, will take to the sea from the Group’s Italian yards in the next years.

Fincantieri is one of the world’s largest shipbuilding groups, the only one active in all high-tech marine industry sectors. It is leader in the construction and transformation of cruise, naval and oil & gas and wind offshore vessels, as well as in the production of systems and component equipment, after-sales services and marine interiors solutions. Thanks to the expertise developed in the management of complex projects, the Group boasts first-class references in infrastructures, and is a reference player in digital technologies and cybersecurity, electronics and advanced systems.

With over 230 years of history and more than 7,000 ships built, Fincantieri maintains its know-how, expertise and management centres in Italy, here employing 10,000 workers and creating around 90,000 jobs, which double worldwide thanks to a production network of 18 shipyards operating in four continents and with over 20,000 employees.
