

KEEL LAYING IN MONFALCONE OF STAR PRINCESS

Second LNG-powered cruise ship built for Princess Cruises

The keel laying of the Star Princess took place in Monfalcone today. She is the second Sphere Class vessel for Princess Cruises, a brand within Carnival Corporation; the first is Sun Princess.

Both cruise ships are dual-fuel, primarily powered by liquefied natural gas (LNG), the cleanest marine fuel currently available on a large scale on the market.

Star Princess will accommodate 4,300 guests and, like Sun Princess, is based on a next-generation platform design. Sun Princess will be delivered in 1Q 2024 while Star Princess in 2025.

Princess Cruises, a world leading international cruise line and tour company, operates a current fleet of 15 modern cruise ships, carrying millions of guests each year to 330 destinations around the globe.

Fincantieri is one of the world's largest shipbuilding groups, the only one active in all high-tech marine industry sectors. It is leader in the construction and transformation of cruise, naval and oil & gas and wind offshore vessels, as well as in the production of systems and component equipment, after-sales services and marine interiors solutions. Thanks to the expertise developed in the management of complex projects, the Group boasts first-class references in infrastructures, and is a reference player in digital technologies and cybersecurity, electronics and advanced systems.

With over 230 years of history and more than 7,000 ships built, Fincantieri maintains its know-how, expertise and management centres in Italy, here employing 10,000 workers and creating around 90,000 jobs, which double worldwide thanks to a production network of 18 shipyards operating in four continents and with almost 21,000 employees.
