2. OFFSET DEFINITION

The term "Offset" refers to any arrangement made under, or in connection with, a contract between the Fincantieri and a customer to generate work or create capability or economic value, in that customer's Country for which that customer's Offset Authority may grant "Offset credits" or otherwise release it from its Offset obligations. Offset programs are often required by foreign governments or companies as a prerequisite to the award of a given contract.

Fincantieri adopted an offset procedure to manage this international business practice, with the aim to increase its analysis capability and the monitoring of the offset programs and offset transactions, in order to avoid any risk of negative impact or reputational damage
