Strategic direction and sustainability

Sustainability is not just an opportunity but a genuine mission for Fincantieri to represent a model of excellence in the world, by adopting a pervasive approach to business that is able to respond to the challenges of a globalised world and is increasingly sensitive to the impacts generated by industrial processes on society and the environment.

The Fincantieri Group is continuing along its path towards sustainable «success» by adopting an integrated strategy that is capable of combining business growth and financial stability with social and environmental sustainability, creating value in the long term. This is why the material topics for the Group have been integrated into the business strategy and the Fincantieri Group’s Sustainability Plan has been implemented.

In 2020, Fincantieri updated the Sustainability Plan, which is Fincantieri’s strategic approach to sustainability and, through the Charter of Sustainability Commitments, it breaks down the commitments undertaken by the Group into qualitative and quantitative targets that can be measured over time. It respects the ten principles of the Global Compact and it contributes to the achievement of the Sustainable Development Goals (SDGs) of the UN’s 2030 Agenda.

Fincantieri’s idea of sustainable and responsible development involves:

- a more widespread dissemination of the sustainability culture;
- promoting a responsible supply chain;
- employee involvement;
- constantly improving health and safety in the workplace;
- support for technological innovation;
- maintaining customer satisfaction and trust levels;
- continuous dialogue with and support for local communities;
- reducing environmental impacts;
- the fight against climate change.

With this integrated strategy, which considers both sustainability issues and business needs, Fincantieri is able to sustainably manage the challenges and opportunities the current and future macroeconomic context bring.
Strategic direction and sustainability

In particular, the Sustainability Plan:

- defines the strategic guidelines linked to the 4 Pillars of the Business Plan (Long term visibility, New horizons and markets, Innovation, Streamlined production);
- confirms the objectives laid out in the Sustainability Plan, approved in 2018, for 2020 and beyond; the timing of some objectives has been revised due to the limitations brought by the COVID-19 pandemic;
- defines new objectives, targets and actions in light of the pandemic.

The Fincantieri Group has been heavily impacted by the global health emergency resulting from the spread of COVID-19 which has radically changed the international economic and social context in which it operates. At this time of major interruption, sustainability is an essential enabling factor that helps to ensure a high level of resilience and sustainable development in the medium and long term. The Sustainability Plan reflects the decisions taken by company management to ensure the Group’s sustainable success.

The Sustainability Plan comprises:

- 17 material topics identified through an online stakeholder engagement survey that enables both the point of view of the Group and that of customers, suppliers and partners, the financial community and other stakeholders to be taken into consideration.
- 24 commitments undertaken by the Group through the Charter of Sustainability Commitments.
- 45 objectives to be achieved in the short, medium and long term that will contribute in particular to the achievement of the 7 SDGs that Fincantieri has recognised as significant for its business and in line with its strategic direction. The Plan’s objectives are updated on a yearly basis starting with the results achieved and adding the new needs that arise over time.

The base year against which the quantitative targets in the Plan are defined is 2017.
Strategic direction and sustainability

Logical steps for aligning the Sustainability Plan with the Business Plan

The 4 Pillars of the Group’s strategy (Long term visibility, New horizons and markets, Innovation, Streamlined production) contain the 17 material topics for sustainability

6 topics are horizontal in that they involve all 4 Pillars and contribute generally to the Group’s growth

The other 11 topics are specifically associated with one of the 4 Pillars and show a clear correlation between the business drivers and those aspects of sustainability that the Company recognises as significant

The material topics are linked to the ten principles of the Global Compact and to the global objectives represented by the United Nations’ Sustainable Development Goals (SDGs) that Fincantieri has recognised as relevant for its strategic direction
Strategic direction and sustainability

**Purpose of the Sustainability Plan**

- Contributes to **creating value for the Group over the medium and long term**, in line with the strategic direction
- Acts as a guideline for implementing corporate commitment, which is expressed through the commitments contained in Fincantieri’s **Charter of Sustainability Commitments**
- Enables the creation of **synergies between units** and a sustainability culture
- Attributes **ownership** of the actions to the various company **Units**, including through the company’s variable remuneration system (**MBO**)
- Addresses the **internal risk drivers** identified (Non-Financial Risks in the Group’s Risk Model)
- Also contributes to improving the **corporate reputation** by attracting the best talent and strengthening the Group’s **visibility**
- Defines the Group’s set of actions to respond to **stakeholders’ expectations**, in particular those of investors, rating agencies and shareholders
- Responds to external drivers such as the United Nations’ **Sustainable Development Goals (SDGs)** and, in particular, recognises those that are linked to corporate development strategies
In terms of methodology, the Plan is developed along the following steps, which were started in 2017:

- Definition of the **sustainability topics** that are significant for the Company
- Involvement of external stakeholders to assess the topics’ **relevance**
- Alignment between the **non-financial risks** and the most significant sustainability topics

- Update of the **Charter of Sustainability Commitments** based on the significant topics to formalise corporate commitment
- **Approval** of the Commitments by the **Board of Directors**

- Involvement of the multifunctional Working Group in the definition of **objectives, targets** and **timetables** that meet the commitments undertaken by the Company
- Alignment with the **strategic drivers**

- Preparation of the proposed **Sustainability Plan**
- **Assessment** of the Sustainability Plan by the **Top Management** and the **Sustainability Committee**, **approval** by the **Board of Directors**
Strategic direction and sustainability

**BUSINESS PLAN**

- **4 Pillars**
  - **Long term visibility**
    - Backlog supported by positive underlying momentum, particularly in the cruise segment
  - **New horizons and markets**
    - Expansion into new geographical areas and development of after-sales services
  - **Innovation**
    - Proven capability to develop cutting edge designs and technological solutions to meet clients’ evolving needs
  - **Streamlined production**
    - Continued focus on seamless execution through streamlining of processes and production

**SUSTAINABILITY PLAN**

- **6 Horizontal topics**
  1. **Governance and business integrity**
  2. **Cyber security**
  3. **Economic and financial sustainability**
  4. **Climate change**
  5. **Relations with local communities**
  6. **Human rights**

- **11 Specific topics**
  7. **Protection of employment and industrial relations**
  8. **Training and education**
  9. **Diversity and equal opportunity**
  10. **Company welfare**
  11. **Customer satisfaction**
  12. **Product quality, compliance with ethical standards**
  13. **Innovation, research and development**
  14. **Environmental impact of products and services**
  15. **Health and safety in the workplace**
  16. **Procurement Activities**
  17. **Environmental management**

---

**SUSTAINABLE DEVELOPMENT GOALS**

- **Growth**
  - Shareholders return
  - Profitability
Within the Sustainability Plan, the 17 material topics are aligned with the four Pillars of the Group’s strategy.

For each Pillar, the SDGs that contribute to them have been identified.

Each material topic and commitment for sustainability undertaken by the Group is declined in: Commitments, Objectives, Description / Target, Expected benefits, Timetable.
### Horizontal topics

### Commitments

Investments in research and innovation with the aim of developing sustainable, efficient, safe and competitive products and processes.

### Objectives

**Development of intelligent ships and platforms (smart ships / smart offshore infrastructure) and autonomous ships. Development of innovative solutions for yards (smart yards)**

### Description / Target

The objective will be developed through the following activities:

- A reference framework for secure interconnection (in terms of cyber security) between all the on-board systems to exchange / record data in real time (or near real time) on open formats.
- On-board systems to support the average level of autonomy (e.g. L4 as defined by LLOYD).
- Offshore platforms capable of collecting double the energy of current platforms.
- Industria 4.0 tool to be adopted at yards to increase productivity.
- Tool to access digital assembly instructions and monitor progress of production work in real time on company technical systems.
- Remotely controlled or unmanned military platforms able to operate in scenarios that are dangerous for operators (e.g. firefighting, detection of contaminated areas, etc.) or able to significantly increase the operational effectiveness of the mission.

### Benefits

- Optimise performance, minimise operating costs and adhering to the highest safety standards.
- Obtain information on the operating status in order to prepare the best operating scenario, even for critical or emergency situations.
- Support development of the blue economy.

### Timetable

| Development of ecologically sustainable products and services with the aim of contributing to a circular and low carbon economy | **Definition of an eco-design system to promote the development of environmentally sustainable ships** | Identify for each project the ecologically sustainable design objectives and ensure that the assumptions, principles and control metrics (KPIs) identified for the construction of an ecologically sustainable product are translated into design choices and acquisition of the plant / machinery that make up the ship product following the internal eco-design procedure.  
In addition, the initiatives already made available will be updated based on the latest technological developments and those which, while widespread and in use for some time, are no longer innovative will be eliminated.  
*Define at least 8 low environmental impact initiatives for the Merchant Shipping Division*  
*Define 10 initiatives, 9 of which are related to CO₂ reduction and 1 to containment of noise emitted into water for the Naval Shipping Division* | Increase the number of eco-design initiatives available to designers in order to implement new systems and components with low environmental impact | 2020 |

| Development of ecologically sustainable products and services with the aim of contributing to a circular and low carbon economy | **Development of maritime ecological dredging services** | Develop the offer of services related to maritime dredging by chartering the vessel Decomar from the company Fincantieri Dragaggi Ecologici S.p.A., with regard to: • Coastal nourishment • Reclamation of industrial sites • Port dredging  
*The project will consist of the following stages:*  
• 2020 - Functional test of the Decomar  
• 2022 - Launch of the service | • Maximise the extraction of available resources and minimise waste in individual dredging areas  
• Minimise the activity’s footprint on the seabed  
• Minimise the negative environmental impacts of the aggregate extraction process  
• Mitigate the dredging effects of aggregates on other users of the seabed | 2020-2022 |
| | **Promote studies and initiatives on the circular economy** | Carry out a study on the circular economy for Fincantieri S.p.A.’s cruise ships in collaboration with a university / research centre in order to: • Analyse the level of maturity of the players in the shipbuilding industry • Identify an analysis methodology • Evaluate and identify the tools needed to implement the logic of the circular economy | • Monitor and strengthen the Company in «green» markets and with customers with a strong focus on these issues  
• Objectively measure impacts along the entire value chain and product life cycle in order to make informed and effective decisions to improve environmental performance and / or to communicate this performance to investors  
• Support management of the brand reputation by improving the company image and relations with institutions and other stakeholders | 2025 |

| Continuous improvement of health and safety conditions of workers | **Promotion of initiatives to engage subcontractors on issues associated with health and safety** | Develop a project («last metre») to engage subcontractors on issues of health and safety management. 
*75% of subcontractors present in Italian yards* | Improve awareness and management of health and safety for subcontractors’ workers | 2022 |
| **Health promotion to disseminate healthy lifestyles** | Develop a project to promote health in the workplace aimed at disseminating healthy lifestyles and preventing illnesses such as obesity, diabetes, strokes, etc. 
*75% of employees of Fincantieri S.p.A. and Italian subsidiaries* | Reduce absenteeism, increase productivity, reduce turnover, facilitate hiring and promotion of a positive image and one attentive to employees’ needs | 2022 |
## Commitments

- Continuous improvement of the health and safety conditions of workers

## Objectives

**Improvement of health and safety at work performance**

## Description / Target

Obtain further improvement in the initiatives aimed at eliminating accidents and protecting the health of workers and the working environment.

*Reduction of the severity index:*
  - 15% of the severity index (no. of days lost due to injury / hours worked x 1,000) compared to 2017 for Fincantieri S.p.A.

*Reduction of the frequency index:*
  - 5% of the frequency index (no. of injuries / hours worked x 1,000,000) compared to 2017 for Fincantieri S.p.A.

## Benefits

Confirm the Company’s constant commitment to:
- Improving health and safety in the workplace performance
- Mitigate the risk of injury to employees
