# FINCANTIERI MUGGIANO SHIPYARD

**ENVIRONMENTAL, HEALTH AND SAFETY POLICY** 

## **FINCANTIERI**

The **Fincantieri Muggiano Shipyard Environmental**, **Health and Safety Policy** is coherent with the relevant Policies of Fincantieri Group.

#### **PRINCIPLES**

The principles implemented by **Fincantieri Muggiano Shipyard**, as reference points for environmental, health and safety management, concern:

- the compliance with the environmental, health and safety legal requirements in force;
- the implementation of Fincantieri group policies and guidelines in the field of environmental protection, health and safety;
- the promotion of employee participation to the risk assessment and environmental, health and safety protection processes, for the benefit of their own, the colleagues and the third parties;
- the stakeholder expectation meeting, as fundamental requirement for the value creation and the sustainable development promotion.

### **COMMITMENTS**

1)

**Fincantieri Muggiano Shipyard**, according to the Company Environmental, Health and Safety Policies and the site demands, commits to translating the principles into actions, continuing:

| <ul> <li>to limit sound emission levels and to decrease smoke and dust pollution in workplace and environment thanks to the modernisation of air extraction plants;</li> <li>to minimise risks of potential pollution through the installation of first rain water purification systems and through the addition of emergency drain blocking systems, case of spillage;</li> <li>to make an awareness campaign addressed to workers operating in the Shipyar regarding the correct ways of separating waste in order to simplify re-use and recycle it;</li> </ul>                | regarding the environment: |   |
|---|----------------------------|---|
| <ul> <li>and environment thanks to the modernisation of air extraction plants;</li> <li>to minimise risks of potential pollution through the installation of first rain water purification systems and through the addition of emergency drain blocking systems, it case of spillage;</li> <li>to make an awareness campaign addressed to workers operating in the Shipyar regarding the correct ways of separating waste in order to simplify re-use and recycle it;</li> <li>to communicate and promote, the use of sustainable transport modes for home-to-workers.</li> </ul> |                            | to keep low energy consumption through the improvement of exteriors lighting systems;   |
| <ul> <li>purification systems and through the addition of emergency drain blocking systems, case of spillage;</li> <li>to make an awareness campaign addressed to workers operating in the Shipyar regarding the correct ways of separating waste in order to simplify re-use and recycle it;</li> <li>to communicate and promote, the use of sustainable transport modes for home-to-workers.</li> </ul>   |                            | to limit sound emission levels and to decrease smoke and dust pollution in workplaces and environment thanks to the modernisation of air extraction plants;   |
| regarding the correct ways of separating waste in order to simplify re-use and recycle it;  to communicate and promote, the use of sustainable transport modes for home-to-work.  |                            | to minimise risks of potential pollution through the installation of first rain water<br>purification systems and through the addition of emergency drain blocking systems, in<br>case of spillage; |
|   |                            | to make an awareness campaign addressed to workers operating in the Shipyard regarding the correct ways of separating waste in order to simplify re-use and recycle it;                             |
|   |                            | to communicate and promote, the use of sustainable transport modes for home-to-work shifts of those who access the Shipyard;  |

## **FINCANTIERI**

- 2) regarding work health and safety
  - to implement engagement activities, directed both to its employees and to the supply companies, in the field of environment and safety protection, as drafting information brochures related to workers health and promoting dedicated meetings for accident analysis;
  - to renew and to improve obsolete equipment in order to improve their performance and to decrease risks of accidents;
  - to improve the protection of the Shipyard towards possible external security threats, through the adoption of the rules defined by the International Code for the Safety of Ships and Port Facilities (ISPS CODE);

### **REPORTING**

- □ Periodic reporting of the environmental, health and safety performance indicators and results:
- □ Disclosure of the environment, health and safety related incident analysis;
- □ Sharing of audit results with the Shipyard organisational structure.

All the **Fincantieri Muggiano Shipyard** employees, and in particular those who are responsible for environmental, health and safety surveillance (starting by Executives and Managers for their competences), have the task to watch over and verify that the above-mentioned principles and commitments were fulfilled.
